LINBINS STORAGE SYSTEMS

LOUVERED PANELS SYSTEM

The only louvered panels on the market today with enough spacing behind the louvers to allow for easy loading and removal of the bins.*

Louvered panel products provide improved efficiency while allowing you to custom-design all phases of your storage, retrieval, transporting, and assembly of parts and materials.

Louvered panels may be mounted on any suitable surface including walls, work benches, free-standing racks, mobile carts, storage cabinets, shelving, slotted-angle or service truck interiors. Panels must be securely fastened to assure adequate load bearing.

Bench racks are designed to mount to any flat work surface to create a minimal cost conversion to the louvered panel system. Bench racks can be used individually or joined together to form a continuous row.

Louvered panels are designed to accept all Linbin storage containers and specialized storage accessories in any configuration and combination.

Louvered panels and bench rack are manufactured from 16 gauge steel and powder coated paint in the color LINVAR BLUE.

LOUVERED PANELS EQUIPMENT **Order Linbins separately*
